

LOOK BEFORE YOU POWER UP.

**Small electrical hazards can lead to serious injuries.
Take a few seconds to inspect before you connect.**

INSPECT BEFORE YOU CONNECT

- Check cords, plugs and power tools for damage.
- Replace worn or frayed equipment right away.
- Use GFCIs where water is present.

KEEP YOUR WORK AREA SAFE

- Keep electrical panels labeled and free from storage.
- Avoid overloading outlets or power strips.
- Use extension cords for temporary work only.

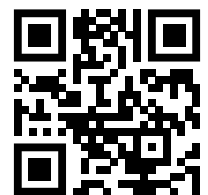

STOP BEFORE YOU SERVICE

- Only work on energized equipment if you're qualified to do so.
- Lock out equipment before maintenance.
- Report anything that looks unsafe before work begins.

Electricity is unforgiving. Respect it every time.
