HELP

Hazard Elimination Learning Program

Workforce Safety and Insurance introduced the Hazard Elimination Learning Program (HELP) grant in January, 2006; applications were accepted through October 15, 2007. The purpose of the HELP grant program was to provide economic assistance through a matching grant program in an effort to remove a work place hazard and improve the safety of North Dakota's workers. Over \$13 million was awarded to North Dakota's employers. Employers participating in the HELP grant program agreed to provide research information on the effectiveness of the safety intervention put in place. This research information will soon be available on this website.

The following employers received funding through WSI's HELP grant program:
