

Snow Removal - Sweeper

Sweeper – Hydraulic powered rotary attachment, which sweeps debris 30 degrees to the right or left.

1. Personnel must be clear of brush and all moving parts before operating sweeper.
2. Eye protection must be worn at all times by operator, and anyone within discharge area of brush.
3. Never sweep toward people, buildings, or cars, etc.
4. Turn engine off and brush to allow all moving parts to stop before adjusting or servicing sweeper.
5. Keep sweeper brush away from intense heat or flame.
6. Riders are not permitted on the sweeper or the vehicle it is mounted on.
7. Do not operate sweeper or tractor unless PTO guards and all shields are in place.
8. Do not dismount or mount, or work on sweeper or loader with the sweeper arms in the raised position.
