

HANDS IN. HANDS SAFE.

Because one wrong choice can lead to months off the job.

▲ WEAR THE RIGHT GLOVES

- Choose the glove for the job: cut-resistant, chemical, insulated
- Don't wear gloves near belts, chains, rollers, or rotating parts
- Gloves can pull you in if they get caught

Scan for more resources from Get Home Safe.

▲ AVOID LINE-OF-FIRE HAZARDS

- Watch where your hands go if something moves
- Don't hold what you're cutting or grinding
- Stay clear of swinging, shifting, or falling objects

▲ WATCH FOR PINCH POINTS AT DOORS, TAILGATES AND MORE

- Hinges, pulleys, doors, and joints can trap your hands
- Use guards, push tools, and safe hand placement
- Never rush; reposition if needed

You use your hands for more than just work.
Protect them like your lifestyle depends on it, because it does.
