## 2021 LMS Courses

Course Course ID	Course Title	Course Description
2021-PS5-00572	2021 - Aerial and Scissor Lifts	Not everything we have to work on is within reach. There are times we need a little help. Sometimes ladders are chosen, other times fixed scaffolds, and still other times mobile equipment like aerial lifts (also referred to as an articulating boom/bucket lifts) and scissor lifts. Working safely with this last category will be the focus of this course. Ideal learners include employees who work on or around aerial lifts and scissor lifts.
2021-PS5-00672	2021 - Contractor Safety	OSHA requires that companies provide a safe workplace for all workers. In order to provide a safe workplace, rules must be in place. Accidents occur as a result of an unsafe condition or an unsafe act, or both. Both are the result of the actions of people. All accidents and injuries are preventable. This orientation will explain the rules in place to prevent accidents and provide a safe workplace.
